work experience

Relevant

LonDance, Freelance Web Designer/Developer, 2018

Conceptualized new structure for current website content. Designing a custom layout to be hosted on the WordPress CMS.
Technologies used: HTML, CSS, JavaScript, PHP, Sass, Gulp.js, Node.js

Apartment Site, Front-End Developer, 2017

Conceptualized and designed the front end of a property management application. Collaborated with back-end developers. The application has uses for potential lessees, current tenants, and management.

Technologies used: CSS, JavaScript, Handlebars.js, MaterializeCSS

AEHI, Inc., Freelance Web Designer/Developer, 2010-2014

Self-started, designed, developed, and maintained company website. Conceptualized animated content. An improved web presence led to immediate client acquisitions.

Technologies used: HTML, CSS, JavaScript, ActionScript, Adobe Flash

Freelance Graphic Design Projects 2008-2012

Designed logos, magazine and newspaper advertisement, and poster art, for multiple companies in sports and telecom.

Additional

Manager, Claremont Pacifica Apartments, 2011-2017

Brought a 42-unit property from 69% occupancy to 100% occupancy in 6 months. Outperformed each previous year, by retaining tenants, upgrading apartments, and increasing rents.

Jig Designer & Graphic Printer, Calibre International, 2007

Engineered acrylic jigs for screen printing on a large catalogue of products, and successfully deployed new laser equipment, which increased laser etching production by 20%.

Operations & CSR, SkyWest Airlines, 1998-2001, 2006-2007

Operated central communication hub by curating new data, and effectively communicating changes across multiple platforms, which led to less man-hours and more on-time departures.
